Dining Hall is Open!

Rapogi Lwanda School Update March 2022

On February 22, the new dining area has its first use as the children use it for their morning school worship. Meanwhile, tables for eating are in construction at the Vocational Centre.

Tables made by students at the Vocational Centre are ready for delivery to the Dining Hall.

At right: This was the Dining Hall under construction last year. The kitchen is at the right end.

The kitchen still has some work to complete—see the picture at right. Most of the kitchen finishing costs have been donated, but approximately $ 2,000 CAD is still needed for new electric stoves. (An old wood stove is still in use in a shed).

Thank you for your prayers and financial assistance through A Better World Canada.

Gardens support some of the school's food needs. The school owns a substantial acreage of good soil for food crops.

A highlight each year is the graduation ceremony for the pre-school classes. A new Early Childhood Classroom building is presently under construction with donations from our Australian supporters.
